# NSW Alcohol Interlock Program

Prepared 21/10/09

Daya Withaneachi

Senior Policy Manager (Impaired Road User Programs)

In New South Wales, drink driving is a factor in approximately 20% of fatal crashes.

Around 18% of those convicted of drink driving each year, have a previous drink driving conviction.

The NSW Interlock Program commenced on 8 September 2003

## **Eligible offenders**

- Middle & high range ( $\geq 0.08$ )
- All repeat offenders

## **Court ordered**

- Existing penalty
- Disqualification suspension order (DSO)
- Voluntary entry

## **Two phased penalty**

- Shorter disqualification period
- Interlock participation period

# NSW Alcohol Interlock Program

## Major issues faced in starting the program

- Program development - designing the elements of the program to meet the needs of NSW community
  - Voluntary or mandatory
  - Offender groups
  - Referrals
  - Disqualification and interlock period
  - How to encourage participation
- Cost
- Administrative issues
  - Interlock provider and servicing of the devices
  - Policies and Procedures

## Key challenges during the program

- Increase participation rates
- Reducing costs
- Increasing:
  - Interlock installers;
  - Doctors; and
  - Lawyers to request the interlock order at court.

## Key achievements of the program

- Low recidivism rates
- Implementation of the program
- Successful partnerships
- Use of WHO best practice medical intervention model

## Future developments for the program

- 2nd *Drinkless* brief medical intervention for participants;
- Address equity issues associated with the program e.g. re-examining the means tested subsidy; and
- Reciprocal arrangements between states and territories for service provision.
